Curb Tellers

**ANOTHER DUPLEX PRODUCTION
(PATENTED)**

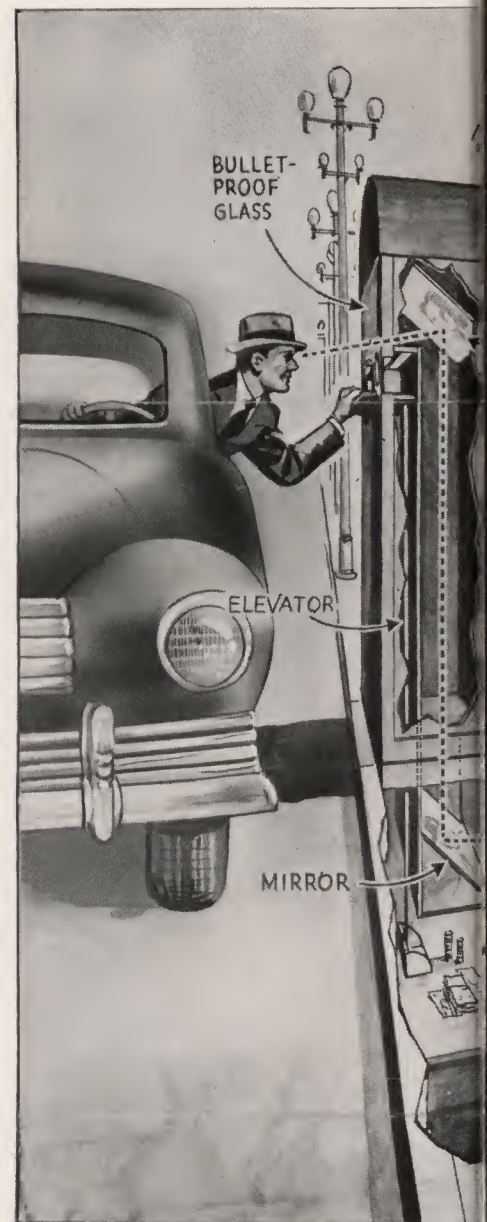

It is now possible for Banks to conduct a complete teller business at the Curb. This is a definite boon for Banks that do not have space for a Drive-In Window. The Curb Teller relieves the parking problem and attracts increased business to the Bank.

The photo on the front cover shows the Curb kiosk or unit with Teller Door, speaker, clock, call-bell and mirror. The teller is located beneath the sidewalk. The microphone enables the teller and depositor to converse. The photo below shows the elevator, mirror, microphone and "up" and "down" switches. The mirrors enable the depositor and teller to see each other.

This system can be applied to bank interiors for customer transactions with tellers located on other floors.

View of Unit at Teller's Counter

The above diagrammatic sketch shows the autoist pushing a button on the unit to call the teller of his desires. The teller (Unit) up and down to complete the transaction. The unit is operated electrically and is equipped with safety devices. The "Teller" unit is locked and is opened and closed.

DUPLEX PROTECTIVE DEVICES

For over 47 years, the Duplex Electric Company has specialized in designing protective devices for banks to safeguard from burglary and robbery the securities and funds of the institution.

Duplex Drive-In Window for mounting in a bank building wall accessible to a driveway over the bank's premises. It is built of bullet-proof glass and steel. It includes a Deposit Unit, Package Receiver (if desired), Microphone Speaker, and Gun-port. These windows are furnished in various types and designs including Bay and Flush designs, etc. They are furnished in selected finishes, including painted finish, aluminum or bronze plate, or stainless steel. We will cooperate with your architect on details or on any special design desired.

DUPLEX VAULT VENTILATOR prevents suffocation from imprisonment in your vault due to accident or bandit attack. Its ventilating capacity will maintain any number of imprisoned persons in comfort. It is standard equipment for vaults.

DUPLEX BANDIT-PROOF BARRIER. This equipment includes a bullet-proof counter-screen and an alarm. It is applied to present screens or to new screens to be erected. An insurance discount of 33⅓% on bank robbery rate may be effected.

DUPLEX BRANCH OFFICES IN LEADING CITIES
